

M.D. Wainwright Council Meeting

The Council of the MD of Wainwright No. 61 met in the Council Room of the MD on Thursday, the 9th day of November, 1950, at 9 a.m.

Councillors Dallyn, Castle, Sutherland, Belanger, Smale, Arthur and Archibald present.

Reeve Sutherland in the Chair.

Belanger—that the Minutes of the 12th October, 1950, meeting, be approved as written. Cd.

Finance

Smale—that the accounts as recommended by the Finance Committee and those subsequently received be passed and paid. Cd.

Sutherland—that the Statement of Receipts and Expenditures for the month ending 31st October, 1950, be accepted and incorporated into the Minutes. Cd.

Treasurer reported that at the date of 9th November an amount of 50 per cent of the Current Levy had been received or 58 per cent equivalent to the Current Levy concerning arrears collected.

Administration and Taxation

Sutherland—that the cancellations be approved. Cd.

Archibald—that a further extension of the discount date on Current Taxes be allowed up to and including the 30th November, 1950, and that a notice be placed in the local papers that this will be the final discount date. Cd.

Correspondence read from the Alberta Association of MD's dated 3rd November—that \$469.46 had been earned by the District in Co-operative dividends as at 31st Aug. 1950, read and noted.

Archibald—that owing to increased railway fares and cost of living that the delegates expenses to the Alberta Ass'n. of MD's during Session 22, 23 and 24 Nov. 1950, be \$50.00 each. Cd.

Archibald—that the Report of Wainwright, Hamilton, Edmonton & Co., Auditors of the MD, dated 30th October, 1950, as to the internal audit period January 1, 1950, to September 30, 1950, as read, be adopted and filed when the adjustments referred to have been made. Cd.

Secretary reported that the following matters had been dealt with while in Edmonton:

1950-51 Prairie Farm Assistance.

Dollar-a-day Hospitalization.

Municipal Liability Insurance.

Central Park Subdivision (Ed. of Public Utility Commissioners).

Municipal Lands in Buffalo Park Reserve.

Arthur—that the Reeve and Secretary be a Committee to complete questionnaire as to Municipal Liability Insurance and obtain more information as to its benefits, etc. Cd.

Sutherland—that the Secretary be guided by Sections 43 of the MD's Act and make necessary arrangements for the holding of an Annual Meeting of the ratepayers on Saturday, February 17, 1951. Cd.

Archibald—that the letter from the Dominion Life Assurance Co. reference to employees Life Insurance, Hospital Benefit and Indemnity contributory scheme be tabled. Cd.

Protection to Persons and Property

Sutherland—that the report of Chrs. Smale and Arthur as to the damage done to crop, the property of C. A. Plaxton by horses owned by P. Teeter, that a damage award of \$25.00 be allowed and that the deposit of both parties be retained to part pay the cost of investigation, be accepted. Cd.

Relief Grants and Health

Royal Alex Hospital—Notice of Admission W. Moncreiff, son of George Moncreiff.

Wainwright Municipal Hospital—Notice of Admission Mrs. A. Falmand, read and comments noted.

Belanger—that Chrs. Dallyn be a committee to interview Dr. Oakley of Chauvin as to his account for MHO work and report at Dec. meeting. Cd.

Municipal Property

Archibald—that the Report of the Reeve reference to proposed trade of Municipal Lands within the Buffalo Park Area for Crown Lands be accepted and that the

Secretary complete the detail in this connection. Cd.

Agricultural Service Board

F. W. Maddex, Field Supervisor, gave his report of months' activities, also discussed the Seed Grain situation for 1951.

Castle—that the report of the Field Supervisor, October 7 to November 4, 1950, inclusive, be accepted and report filed with his records. Cd.

Public Works

Secretary reported that A. L. Harden had signed a statement releasing the MD from all alleged damage to the SW 4-46-4 by ditching and flooding and that a cheque for \$300.00 had been delivered to him.

Archibald—that the Reeve be empowered to sign General Account pay sheets apart from the certification. Cd.

Secretary—Notify C. B. Atkins, A.T.S., that any field work not completed at this date be left until spring of 1951.

Chrs. Dallyn reported that the earth work between Sections 10 and 11-45-2 had been completed.

Matter of purchasing a Domett Elevating Grader attachment for the No. 12 Motor Grader tabled until a demonstration had been arranged.

Road to Chauvin cemetery, no action.

Sutherland—that the pay sheets be passed and paid when signed by the Councillor concerned.

Belanger—that Council adjourn until 9 a.m. Thursday, Dec. 14.

Glen-Coa Cleanings

Walter Lovig has been a patient this past while at Hardisty hospital.

Several others of our district have been on the sick list of late. Mr. A. Steffensen has been quite ill. For them all, a speedy recovery.

Henry Lovig is a victim of the mumps.

Remember the sale of work and tea of Sharon Ladies Aid to be held at Sharon Church on Saturday afternoon, Nov. 25. The annual meeting of Sharon Ladies Aid is to be held on November 30 at the home of Mrs. J. Halvorsen.

ST. MARY'S CHURCH NOTES

Service of Evensong will be held in St. Mary's Church on Sunday, December 3 at 2:30 p.m.

NOTICE TO EX-SERVICEMEN

Com. J. Davidson, president of Wainwright Branch, announced that the Wainwright Legion will place anyone seeking construction employment at the Wainwright Military Camp. Send your name and address direct to him or turn it in to the local branch sec.

Legion Rally Held at Edgerton

Edgerton Legion branch was host to representatives from Viking, Kinross, Irma, Wainwright, Paradise Valley and Edmonton DVA.

Zone Commander Selmer Hasto from Viking conducted the business of the meeting, calling on each branch representative to outline their organization activities.

Com. R. Congdon spoke as the Irma delegate.

Com. Carl Heckbert was guest speaker and chose as his subject "The National Legion Organization." Here he stressed the important part the smaller local branches were playing in the organization which has been directly responsible for veteran welfare legislation in Ottawa. Canada today leads all other countries in Veteran Welfare services. This has only been possible through the service of sincere men and women who have taken up the legion challenge that: "Their sacrifice will ever inspire us to labor on to the end that those who survive and need our aid may be assured of assistance and that the country for which they died may ever be worthy of the sacrifice they made."

In closing, Com. Heckbert left a challenge with every ex-serviceman or woman to give their legion branch and community the loyal support that they gave our country in time of war.

The Edgerton legion hall was smartly decorated for the occasion and much credit is due their entire organization for the work and for the planned entertainment that followed the business meeting.

Northern Nuggets

Mr. and Mrs. J. Tully are working in Edmonton for the winter.

Robin Johnson is back in our district again.

We are sorry to hear that Mrs. Allen Sr. is a patient in the Mannville hospital.

A number of Albert folks attended the 40th anniversary of the United Church at Irma on Monday evening.

There seems to be a lot of flu these cold days.

Southern Sayings

Mr. Leslie Fluk left for his home at Beaver Flat, Sask., this week.

Mr. and Mrs. Lew Reber of Rosalind were visitors in the district over the week-end.

Eddie Jackson spent his 21st birthday in bed with the mumps. Lucky it wasn't from the bumps. Eddie.

Mr. and Mrs. Roy Reber and family and Mr. and Mrs. David Hooge and family spent Sunday at W. E. Reber's, Hardisty, to celebrate their 52nd wedding anniversary.

Junior Wheat Club To Sponsor Fair November 27

The Junior Wheat Club Seed Fair will be held on Monday, Nov. 27 at 2 p.m. in the Irma School.

An official from the Dept. of Agriculture will be in charge of the judging. Members family and anyone else interested are cordially invited to attend.

Irma Board of Trade will sponsor a banquet for the club members after the program.

It is hoped that a good crowd will turn out to show their interest in this worthwhile project.

Film to be Shown November 30 at Alliance Tabern'cle

A scientific-religious film in natural color "Dust or Destiny" will be shown in the Alliance Tabernacle at Irma on Thursday evening, November 30 at 8 p.m.

This film scientifically shows the wonders of nature. Beginning with the human body it shows astonishing facts such as, how during a normal life time the human heart pumps enough blood to fill a string of tank cars fifty-miles long. Interestingly portrayed is the 50 mile flight of a homing pigeon. The long migratory flights of birds. The strange biological phenomena of a fish nesting on land.

The star performer in the production is Mickey, one of many bats which show that "Radar" is a bat's secret guide.

If you are interested in science and nature, be sure to see "Dust or Destiny" at the Alliance Tabernacle on November 30, 10 p.m.

There is no admission charge for this fascinating sermon from science but a free-will offering will be received for the producers, the Moody Bible Institute.

Jarrow Youngster Passes Away

KENNETH DALE SKORI

Kenneth Dale Skori, son of Mr. and Mrs. Edward Skori of Jarrow, passed away at Viking hospital on November 14 at the age of two years, eight months and fifteen days old. He is survived by his loving brother Leonard, and one sister Norine, Mrs. Lewis Overbo, Edmonton, Mr. and Mrs. Julius Aune, Bowley, Alta.

Funeral services were held at Trinity Lutheran Church south of Kinross on November 17 at 2 p.m. Rev. I. J. Saugen officiated and funeral arrangement by A. Ronah, a Viking.

Pall bearers were Messrs. Arthur Overbo, Tom Overbo, Ole Overbo and M. McCune.

The floral tributes were from Trinity Lutheran Church, Aunt, Uncle Pat, Auntie Maude and Uncle Lewis; Gordon and Lawrence; Auntie Knute; Uncle Teddy and Callie; Knute, Milda and family; Tom Overbo; Alice, Arthur and Vivian; Borghild, Bill and Shirley Anne; Elsie, Ed and Olga; Mr. and Mrs. Ole Overbo; Nora, Peter and family; Gilbert, Elsie and boys; Percy Knute and family; Mr. and Mrs. A. C. Loades and family; Mr. and Mrs. M. Lovig and family; Mr. and Mrs. G. Mathews and family; Mr. and Mrs. Wm. Jameson, Howard and Grant; Mrs. Sather and children; Mr. and Mrs. M. McCune and family; Mr. and Mrs. H. Anderson and family; Jarrow School; Red and White Store, Kinross; Mr. and Mrs. Belton and family.

Memorials were to Trinity Lutheran Church from: Mr. and Mrs. H. A. Whidden; Mr. and Mrs. G. R. Whidden.

To the United Church of Jarrow from: Mr. and Mrs. Norman Stauffer and family; Willy Allen.

Entertains WMS

On Thursday, November 16, Mrs. V. Hutchinson entertained the WMS at her home. The ladies had a very enjoyable evening and the new study book "The United Church Re-enters Japan" proved most interesting. The supply secretary, Mrs. M. Knudson discussed with the members the need of clothing, etc. for overseas relief.

Mrs. Hutchinson and Mrs. Coffin served a delicious lunch, bringing a pleasant and profitable evening to a close.

CARD OF THANKS

I want to thank all my friends for the lovely cards, kind letters and messages, books, games, fruit, etc. during my stay in the hospital and convalescence. Also all those who inquired as to my progress and helped Mom in any way. We shall always remember your kindness and generosity.

—Joy Reber.

Irma United Church Celebrates 40th Anniversary

The Irma United Church commemorated its fortieth anniversary on Sunday and Monday of this week. A good crowd attended both services and the anniversary supper was beautifully supplied.

Rev. F. E. Kemp, former pastor of the church was the guest speaker. At the Sunday service his text was "All things are yours for ye are Christ's and Christ is God's." He pointed out the wonderful fellowship possible to all in the Christian Church and the faith, hope and joy open to all in these troubled times.

The ladies choir augmented by Messrs. Arnold Enger and Gordon Fenton and the Rev. Inglis sang the anthems "I was Glad" and "Win the World for Christ."

A short program followed the supper on Monday evening. The Rev. H. W. Inglis was in the choir and voiced his appreciation for the fine gathering despite the cold weather and the inroads of mumps. The choir sang two numbers. There was a violin and piano duet

by Mr. O. Nissen and his daughter Joan, a reading by Mrs. E. H. Targett and two vocal duets by Arnold and Joy Enger. Mr. I. S. Reeds then expressed thanks to the ladies and all those who had helped to improve the church properly.

Rev. Kemp again spoke. His subject was "The Church Business." He spoke of the many benefits that a church brings to any community but he pointed out clearly that the church's true business is that we come to know Christ and to live in Him.

A count was made to see how many were in the building on November 20, 1950 who had been there on the 20th of November, 1910. It was gratifying to note that thirteen old timers were with us in our present anniversary who had helped to celebrate the opening of our church.

The next big anniversary will be the Golden one in 1961. Let's all get behind our church and have some wonderful triumphs to record in the next ten years.

WEDDING BELLS

BRADY — LARSON

Irma United Church was the setting for an attractive wedding on Monday afternoon when Miss Dorothy May Larson, elder daughter of Mr. and Mrs. Haakon A. Larson became the bride of Mr. Leslie Clifford Brady, son of Mr. and Mrs. Timothy Brady of Edmonton and formerly of the Willow View district.

Rev. Inglis performed the ceremony in which the bride was given in marriage by her father.

The bride wore a gown of white satin styled with a sweetheart neckline and a slim midriff panel, embellished with rich embroidery. Her veil of sheer embroidered net was held in place by a halo of white tulle trimmed with pearls. She carried a bouquet of red roses. Her only jewelry was a string of pearls, gift of the groom.

Miss Ellen Brady, sister of the groom, was maid of honor and Miss Clara Lou Larson, cousin of the bride, was bridesmaid.

Miss Brady chose a floor length gown of pale blue tulle with a circular neck line and a bustle. She wore a blue net chapel veil and carried a colonial bouquet of mums and carnations.

Miss Larson's pink tulle floor length dress had a circular neck line and a full over-skirt of pink tulle. She wore a bandeau of pink flowers in her hair and carried a colonial bouquet of mums and carnations.

Kenneth Brady, brother of the groom, and Mr. Claude Larson, cousin of the bride, attended the groom.

Mrs. G. Hurst played the wedding music and Miss Shirley Pyle, cousin of the bride, sang "You are my True Love."

Mrs. Larson, mother of the bride, chose a wine colored tulle afternoon dress trimmed with old braid and a small matching hat. Her corsage was of white carnations.

Mrs. Brady, mother of the groom, wore a wine dress of tulle and velvet with a matching hat. Her corsage was a gardenia.

Latter a reception was held for about 40 guests in Hadley's Hall. A beautiful four-tiered wedding cake flanked with white tapers, decorated the bride's table which was covered by a lovely crocheted cloth.

Mr. Ross McFarland Jr. proposed the toast to the bride and groom. During the reception, Miss Shirley Pyle sang "Thru the Years" and little Dale Larson, brother of the bride, sang "There's a Bluebird on my Windowsill" and "Slipping Around."

In the evening a wedding dance was held in the Albert School and was well attended by friends and neighbors. After supper all joined in singing "For They are Jolly Good Fellows" and dancing continued until the wee small hours. The newlyweds are spending their honeymoon in Edmonton and will make their home in the Albert District.

The folks of Irma and district extend best wishes for success and happiness to Mr. and Mrs. Brady.

TINDALL — FUNK

A quiet but pretty wedding was solemnized in the Irma United Church on November 3 when "Thea" Bette, second daughter of Mr. and Mrs. Peter Funk of Irma became the bride of Leslie Tindall, son of Mr. and Mrs. Geo. Tindall of Fabry.

The ceremony was performed by the Rev. H. W. Inglis.

Given in marriage by her father, the bride wore a floor length gown of white satin. A necklace of pearls of the room was her only jewelry. She carried a bouquet of red roses.

The groom's sister, Doreen Tindall, was bridesmaid and chose a floor length gown of pink tulle. Her flowers were pink carnations.

Mr. Larry Funk, brother of the bride, was best man.

For her daughter's wedding Mrs. Funk chose a green tulle dress with black accessories and wore a corsage of red roses.

Mrs. Tindall, mother of the groom, wore a blue afternoon frock with a corsage of red roses.

Following the ceremony a reception for 50 guests was held at the bride's home. The bride's table was centred with a square three-tiered wedding cake topped with a bride and groom under a horseshoe arch. Serving were Mrs. Jack Taylor and Mrs. Wm. Ewert.

A dance was held at Paschendale school after which the bridal couple left for a short honeymoon at Edmonton, Sundry and other points. The bride's going away costume was a brown gabardine suit.

On their return Mr. and Mrs. Tindall will make their home on the groom's farm north of Fabry.

Making Appeal For Used Clothing

The United Church here is making an appeal for used clothing, quilt pieces, flour sacks for quilt making, in fact for anything that will help in the effort to send relief to Europe, Japan and other needy places.

The WMS are most grateful to those who have already sent in quilt pieces, etc. A fine quilt was made by that society on Thursday of this week.

The need is great and the WMS and other church workers will be glad to donate time for the making of quilts if more materials are available. Leave donations in the church parlor or with any of the WMS members. There is a special, most urgent need for baby clothes for overseas. Donations of flannellette for diapers or any other infant apparel will be gratefully received and promptly dispatched.

An Essential Service

ANOTHER CROP SEASON IS ENDED in Canada and the products of the farms have been marketed or put in storage to be sold later or to be used by the farmers themselves. At this time we are once more reminded of the important part which transportation plays in the distribution and marketing of agricultural products. Distances are great in Canada, and differences in soil and climate give rise to a wide variety in the type of crops grown in different parts of the country. Fruits and vegetables grown in British Columbia are marketed in the Prairie Provinces, while surplus grain and livestock from the Prairies are distributed in British Columbia and in the East.

Trucks And Cars Used

In a booklet issued recently by the Dominion Department of Agriculture there is an interesting section on the importance of transportation in the marketing of agricultural products. Attention is drawn to the use of refrigerator cars, cold storage warehouses and grain elevators "which make it possible to market currently-produced products in a fresh condition to consumers in widely scattered areas, to carry over surpluses to periods when supplies are usually short, and to provide adequate storage for Canada's grain harvest." The extensive use of trucks in marketing farm products is also discussed. In 1948 truck licenses and operating costs of farm trucks in Canada amounted to \$30,813,000, while the costs for operating farmers' cars for business purposes was \$34,000,000. These figures indicate the importance of trucks and cars to production and marketing in Canadian agriculture.

Railways Move Farm Products

Railways are likewise vital to the marketing of the crop each year. In 1947 the Canadian railway system transported nearly 35 million tons of agricultural products. The carrying of grain from the Prairies to the terminals at Port Arthur and Fort William as well as to Vancouver and Churchill is one of the greatest undertakings of the railways in this country and each year many thousands of freight cars are sent to Western Canada to remove the wheat crop. In 1947, 13 million tons of wheat and 8 million tons of other grains were carried by the railways. Inland water transportation is also important in moving products from the lakeheads for export, as well as in supplying the Maritime Provinces and Newfoundland with farm products from other parts of Canada. The value of efficient transportation services in distributing and marketing the crop each year are shown in these facts and figures compiled by the Dominion Department of Agriculture.

NOW! CHILDREN'S SIZE ASPIRIN

UNFLAVORED

Can't be mistaken for candy!

Sense people, reliable action that has made Aspirin famous for half a century. Easy for mother to administer in small doses as prescribed.

30 TABLETS 29¢

Funny and Otherwise

All over Canada there are daily examples of the case of the lady driver who made a right hand turn from a left hand lane and promptly rammed an other car.

The driver of the other car got out, surveyed the damage, and demanded angrily: "Lady, why didn't you signpost?"

"Because," she snapped, "I always turn here, stupid!"

Mother—Billie, sit down and tell your sister a story.

Billie—I can't sit down, mother. I just told daddy a story.

Bystander: "Do you know 'The Short Out to the Roses'?"

Vocalist: "Yes, do you want me to sing it?"

Bystander: "No—take it!"

Jim—Yep, the engagement is off—she won't marry me.

Joe—Why's that? Didn't you tell about your rich uncle?

Jim—I sure did. Now she's my aunt.

He sat fidgeting and nervous in the solicitor's waiting-room.

A clerk entered, took a note, and said: "I say," said the client, beckoning to him, "I have an appointment with the solicitor at ten o'clock. It's about a legacy."

"And how long have you been waiting?"

"Twenty years!"

A guest at a certain hotel remarked to a fellow-guest: "I don't know why they call this hotel the Palms. I've never seen a palm anywhere near the place."

"You'll see them all right before you go," replied the second guest, knowingly. "It's a little surprise the whole staff keeps for guests on the last day of their stay."

"I've decided on a name for baby," said the young mother.

"I shall call her Nanette."

Her husband thought it was an awful name to give a girl, but being a wise and tactful fellow, he did not object.

"Splendid," he said cheerfully. "The first girl I ever loved was called Nanette, and the name will revive pleasant memories!"

There was a brief silence, then:

"We'll call her Mary, after my mother," said the young wife firmly.

"I don't care if it is a high-class party," hissed the convention-hating young husband. "I'm going to be my natural self!"

"Very well," said his wife, resignedly, "but if you start throwing coconuts about, I'm going home."

The telephone's dramatic society was presenting a play. The producer was briefing the heroine.

"Now, don't forget," he told her, "when the villain takes you in his arms you have to cry out loudly. Please save me. Oh! Oh!"

She brought down the house on the first night when she cried: "Please save me! O, double-o!"

But What Does The Chicken Think?

—Continued From Page 1.

Technicians Rosemary Poplinski, (left), and Olive Newton of the University of California, Los Angeles, medical school, are studying one of the three-winged chickens used in skin graft studies here. The third wing, transplanted from another chick from egg to egg before birth, is attached to the chicken's breast. Researchers are trying to determine why a chicken wing can be successfully transplanted before birth, but not after birth. The answer may be a big help in the progress of surgery. Chicks involved in the experiments grow up to be healthy hens and roosters, except that half of them have three wings and the other half only one.

ODDITIES IN THE NEWS

An eight-year-old boy of Nobleton, Ont., borrowed his father's .22 rifle and went hunting on the farm of a neighbor, Lorne Shearman. His day's bag was: two cows killed, two wounded.

A miniature calf weighing only nine pounds has been born on a farm near Namur, Belgium. It was otherwise normal.

A judge in London, England, ordered a pianist to take off his shoes when practising. A woman in the room below complained to the court because he stamped loudly on the floor while he practised. She asked that the pianist be thrown out. The judge refused her request.

L. J. Gagnon, a Fort William motorist, found that it is some compensation to have a hunting licence when your car kills a deer on the highway. Damage to the car, which struck the deer on the Nipigon highway, was about \$150. Being the possessor of a hunting licence, Gagnon was allowed by the fish and wild life division of the department of lands and forests to keep the deer.

In Japan, even the bugs are bugs about new lights. In an address at Edmonton, Sub-Lt. William Jackson, R.C.N. (R), of that city, said Japanese are going in for blue neon lights on their farms. The farmers use to bright lights to attract insects away from their rice fields. Their small farms are literally studded with blue neon, he said. Jackson served abroad H.M.C.S. Athabasca during the early days of the Korean war.

Claiming she was a kneeless bride, Actress Jean Wallace, 27, former wife of Franchot Tone, was granted an annulment in Los Angeles of her marriage to Jim Lloyd Randall, 23, former army sergeant.

Former Saskatoon Paymaster Still Inventing Gadgets

VANCOUVER.—Lawrence Walshe may invent a memory course so he can remember all the gadgets he has invented. Mr. Walshe, 66, admits he can't remember them all.

Among them is an automobile license plate which is illuminated at night. Then there's a mathematical pie-cutter that cuts a pie in one operation, with every piece the same size.

Mr. Walshe, paymaster for the city of Saskatoon for 20 years before coming here eight years ago, thinks highly of his stove pipe that can be cleaned without being removed.

He laments that no one has so far purchased his flag that will fly in the proper manner regardless of wind, rain or taxes.

Then there is the self-opening envelope, zipper safety lock, combination pants presser and a pocket umbrella, none of which has made him rich.

Gertrude means "spear maid".

Going Ahead

Construction In Bustling Flin Flon A Nightmare

FLIN FLON, Man.—The people of this bustling mining town claim the place is like nothing else in the world. They're probably right. The main section of Flin Flon, where older houses and most business premises are built, is perched on the hard-rock surface of the pre-Cambrian shield. Construction is a nightmare.

Most basements are above ground level. Sewer and water pipelines run above the ground—some of them over the heads of pedestrians—instead of being buried.

Street lights burn night and day. If you die in winter, your body goes into cold storage for burial in the Spring when the ground thaws.

There are proportionately more children of pre-school and school age than in any other town of the same size in Canada.

But for all its oddities, Flin Flon (on the Saskatchewan-Manitoba border 400 miles northwest of Winnipeg) is going ahead.

The original above-ground sewer and water system was built in 1932 and services what now is only one-fifth of the town. Under way in suburban sections is a program to extend these services to the rest. Mayor Cecil Stevenson said the scheme will cost \$1,515,000 "for a starter".

Workmen are enjoying the novelty of putting pipes underground in residential areas where there is enough soil on the hard rock.

Hudson Bay Mining and Smelting Company, lifeblood of the town, is paying 55 per cent. of the initial cost.

The Flin Flon terrain is so hilly that some houses have a 30 to 50-foot difference between back and front yards. Others are perched on the rock with wooden stairways to the street.

Some residents can walk in their front door at ground level and look out their back door to a street 30 feet below.

Stairways are a big part of the Flin Flon sidewalk system. On winds up a hillside with almost 100 steps and several plateforms.

The boxed-in sewer and water pipes, packed with sawdust to prevent freezing in Flin Flon's severe winter, are used unofficially as sidewalks. But signs warn residents they navigate them at their own risk.

Typical of the old location of the town is its baseball park. There is a natural grandstand—a huge rock outcropping at least 100 feet high which can accommodate a sizable crowd of spectators.

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning!

The liver should pour out about 2 pints of bile into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sick and the whole lot goes sour.

It takes three mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills. See us at any drugstore.

MACDONALD'S BAKER

Canada's Standard Smoke

Bake this tasty CHEESEBREAD easily, speedily with new Fast DRY Yeast!

● New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast! Never a worry about yeast cakes that stale and lose strength... new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

CHEESEBREAD

● Scald 3 c. milk, ¼ c. granulated sugar, 1½ tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-

sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans (4½" x 8½"). Grease tops and sprinkle each loaf with ¾ c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

THE TILLERS

I'M SORRY HUNK, BUT TOM DAVIS ASKED ME TO GO TO THE SUNDAY SCHOOL PICNIC WITH HIM!

WHAT?

WHY THAT SNAKE-IN-THE-GRASS? BELIEVE YOU'RE ALWAYS WENT WITH ME!

WHY, HUNK, I BELIEVE YOU'RE JEALOUS!

YOU'RE DARN TOOTHIN' I AM!

I WAS COUNTING ON EATING YOUR POTATO SALAD AND CHOCOLATE CAKE!

Scholarship Winners

Three students from western Canada were included in a list of scholarship and prize winners announced by the University of Western Ontario, at London. They are Samuel Lalmon of Kamack, Sask.; Ian H. Fiddes, of Vancouver, and Mary Patricia Leith of Victoria.

FORECAST CURE FOR CANCER BY 1960

CHATHAM, Ont. — Canadian scientist Dr. Gerald Wendt predicted that atomic research will help find a cure for cancer by 1960.

"The research may even lead to the secret of life itself," he told a Chatham businessmen's meeting.

Dr. Wendt also affirmed his belief that the hydrogen bomb, if and when it is produced, will not be used in warfare.

In old age, normal people lose 12 to 14 pounds of the average weight.

Montreal Tops List

Seventeen Young Players Entering N.H. League

THERE are 17 young players entering the National Hockey League this season determined to become regulars. Every one of these 17 players is a candidate for the Calder Memorial Trophy awarded each year to the outstanding first year performer.

Montreal Canadians top the entry list in the youth parade. The bleu-blanc-rouge boys have six rookies on their squad this season. Boston Bruins and Chicago Black Hawks each have three freshmen on their roster, while Toronto Maple Leafs and Detroit Red Wings have two newcomers apiece and New York Rangers a solitary rookie.

Of the 17 new players, two are goalkeepers, six are defencemen and nine are forwards. Following is a thumbnail sketch of the 17 rookies by team.

Montreal Canadians

Gerry McNeil is a 5'7", 155 lbs. goalkeeper who has taken over the netminding duties of the team from Bill Durnan. He was born in Quebec, Que., on April 17, 1928. Played six games for Canadians last season and only allowed nine goals to be scored against him. Played the last two games of the Stanley Cup semi-finals against Rangers. In 65 games in Cincinnati in the American League last season he was beaten 201 times. He played two games for Canadians in 1947-48 under the three-game amateur tryout rule.

Tom Johnson played for Buffalo Bisons of the A.H.L. last season where he scored seven goals and had 19 assists for 26 points. He is a six-foot, 180 lbs. defenceman who revels in the heavy going. Born at Salford, Man., on February 18, 1928, he played the final game of the playoffs for Canadians last spring.

Bert Hirschfeld is a versatile young forward who plays center or either wing. He is one of the best skaters in hockey and an excellent puck carrier. Bert is the only player in the N.H.L. born in the Maritime Provinces. He was born in Halifax, N.S., on March 1, 1929. He stands 5'10" in height and weighs 165 lbs. Played last 13 games of regular season and all playoff games for Canadians last year. He had 22 goals and 12 assists for 34 points for Cincinnati before being brought up by Canadians.

Frank King is a six-foot, 180 pound center who played for Minneapolis Millers in the U.S.H.L. last season where he had 34 goals and 30 assists for 64 points. Born in Toronto, Ont., on March 7, 1929, he was bought by Canadians at the end of last season.

Vern Kaiser is a rangy, blond left winger who tallied 19 times and had 19 assists for 38 points with Springfield Indians of the A.H.L. last season.

He is an even six feet and weighs 180 lbs. He was born at Preston, Ont., on September 28, 1928 and was traded to Canadians during the summer.

Paul Masnick is the youngest player in the National Hockey League. The 5'9", 155 lbs. centre is still eligible for another year of junior hockey. Paul starred for Regina Pats, Memorial Cup finalists last season, and racked up 43 goals and 44 assists for 87 points. He was born in Regina, Sask., on April 14, 1931 and is regarded by Dick Irvin as a youngster with terrific potentialities.

Steve Kraftcheck is a 5'11", 195 lbs. rugged defenceman who Boston purchased from Cleveland Barons of the A.H.L. He was born in Tinturn, Ont., on March 27, 1929 but learned his hockey in Hamilton, Ont. He had seven goals and 87 assists at Cleveland last year. A hard hitting defenceman, Eddie is a fast breaking rearguard and completely fearless. He stands 5'9" and weighs 185 lbs. He was born in Winnipeg, Man., on March 2, 1926 and had 26 points with Cleveland last season.

Eddie Heigle came to the Bruins from Cleveland the same time that Kraftcheck did and he is also a defenceman. Eddie is a fast breaking rearguard and completely fearless. He stands 5'9" and weighs 185 lbs. He was born in Winnipeg, Man., on March 2, 1926 and had 26 points with Cleveland last season.

Lorne Ferguson is a clever 20-year-old left wing who scored 35 goals and had as many assists at Tulsa last season in his first pro season. Lorne is six feet and weighs 185 lbs. He played the last three games for Boston last year and had one goal and one assist. Reputed to be a great prospect.

Chicago Black Hawks Gord Fashaway was the fourth highest scorer in the U.S.H.L. last season. He is a 5'11", 180 lbs. left wing who was born at Portage la Prairie, Man., on June 18, 1926. Fashaway had 52 goals and 32 assists for 84 points while toiling for Kansas City last year.

Vic Stastuk is a 6'5", 185 lbs. right winger who could easily develop into one of the best wingers in the N.H.L. He played the last 17 games of the season for Chicago last year and before that played with Kansas City. He had 23 points with K.C. He was born at Lethbridge, Alta., on May 23, 1929.

Hugh Coffin is a 21-year-old defenceman fresh from the Calgary Stampede of the Western Canada Amateur League. A 5'10", 180 pounder who knows how to take care of both himself and opposing players. Hugh is tabbed very highly by Coach Eddie McDowell. He was born at Blainville, Sask., on December 15, 1928.

Toronto Maple Leafs Hugh Bolton is a 6'3", 186 lbs. defenceman who was born at Toronto, Ont., on April 15, 1929. He was an outstanding player with Toronto Marlboros, Allan Cup winners last year. Besides being a tower of strength defensively he is also a good scorer. He had nine goals and 33 assists for 40 points last season. Hugh is a top-notch two-way player and great things are expected of him by the Leafs this campaign.

Danny Lewicki has been on of the most publicized amateur players in Canada the last two years. He enters the N.H.L. with a terrific record. Last year he had 36 goals and 37 assists for 74 points while playing with Toronto Marlboro Juniors. After the juniors were eliminated he joined the seniors and aided them in winning the Allan Cup. Danny was born on March 12, 1931 and is one month older than Masnick. Fort William, Ont., is his birthplace. He stands 5'6" and weighs 166 lbs.

Detroit Red Wings

Terry Sawchuk was selected as the outstanding rookie in the A.H.L. in 1948-49 and the year before won similar honors in the U.S.H.L. Last season he was selected as the All-Star goaltender in the A.H.L. The husky 5'11", 190 lbs. puck-blocker led 188 pucks get past him in 61 games last season at Indianapolis. He was born in Winnipeg, Man., on December 28, 1929 and played seven games for Detroit last year and allowed 16 goals to be scored on him.

Marcel Pronovost is a colorful French-Canadian defenceman who might easily develop into one of the biggest drawing cards in the League. He stands 5'11" and weighs 180 lbs. He was born on June 16, 1930 at Lac Beauport, Que. At Omaha last season in his first year of pro hockey he scored 13 goals and assisted in 39 others for 52 points. He played nine games for Detroit in the playoffs.

Reg Sinclair is the lone rookie on the Rangers this term. Reg is a right wing and an exceptionally fine goal scorer. Last year he played for Sherbrooke Saints in the Quebec Senior Hockey League and had 15 goals and 34 assists for 49 points. He was born at Lachine, Que., on March 6, 1926, stands 6' and weighs 165 lbs.

GRAPE CROP LARGEST IN NIAGARA'S HISTORY—Largest grape crop in the history of the Niagara peninsula will be harvested this year. Betty Neden is shown with a portion of the crop. Forty-five thousand tons of grapes will be gathered, though other fruit in the district is down very much in volume.—Central Press Canadian.

New Seed May Defeat Potato Blight

OTTAWA — Dominion department of agriculture scientists think they may have found the answer to one of the great plagues in nature—late blight of potatoes. The department says it is now ready to distribute certified seed of two highly resistant varieties known as Canoe and Keswick.

Manitoba has been hard hit by this potato disease during the last decade, with heavy losses in some seasons, particularly in the Red River valley. The new varieties are reported to have done well in Manitoba field tests.

Canoe and Keswick are being multiplied in every province except Alberta and Saskatchewan, where late blight has not been a threat. Asked just how good the new varieties were, J. W. Scannel of the department's plant protection division here (and formerly stationed at Winnipeg, said they might mean as much to the potato industry as the development of Thatcher wheat meant to the western grain grower.

On the score of quality and yield, Mr. Scannel, one of the recognized potato authorities in the country, said that both Canoe and Keswick in their field tests have compared favorably with Green Mountain in more areas. Green Mountain is regarded as the standard measurement, as Marquis for other wheats.

Officials of the department's horticulture division, responsible for the development, described it as "of vital economic importance" to the nation's tuber industry.

SURVEY DUCKS

DELORAIN, Man., Whitewater Lake, a popular duck and goose hunting area in southwestern Manitoba, is to be the site of extensive hunter surveys during the duck season. The survey is part of a long term conservation plan.

Fashionable Spanish nobles about the middle of the 14th century wore false beards.

Canadians Offering To Grow Beards For Canterbury's Festival

CANTERBURY, England—Beards grown in Canada may grace Canterbury's festival of Britain pageant next year.

Mayor Stanley Jennings has received a letter from several Canadians offering to grow beards and then come over to take part in the celebration.

Mayor Jennings recently appealed for strong men to grow beards to lend realism to historical aspects of the pageant.

Smile Of The Week

John rushed around looking for his coat.

"What do you want it for, dear?"

"That fellow Smith across the road just telephoned to ask if I can lend him a corsetcase."

"Well, what do you want your coat for?" Surely there's no need to go out? You can send Mary with it."

John turned upon her more in sorrow than in anger. "My dear," he said, "your last remarks sum up the whole reason why women cannot lead armies, control nations, or take anything but a subordinate part in the affairs of the world."

TRY AND STOP ME!

BY BENNETT CREEF

A motorist stopped at a tiny crossroads gas station and when he wasn't served immediately, called out sarcastically, "Everybody in this one-horse burg suddenly drop dead?" Uncle Elroy, rocking peacefully on the porch, took the cornucop out of his mouth, and called back, "Faintly likely. You're the first buzzard we seen around here today."

MOST ENGINEERS FINDING JOBS WITHIN CANADA

EDMONTON.—Nine out of 10 Canadian engineering graduates are finding employment in the Dominion. James A. Vance of Woodstock, Ont., president of the Engineering Institute of Canada, said here. He is making a country-wide tour of the society's 32 branches, which have a total membership of 13,500.

Pilots Have Trouble With Birds, Wind

BIRDS, ducks, lightning and wind ganged up on four big airline transports recently, but the high-flying pilots brought their planes and several score passengers through unscathed.

An American airlines pilot flew his four-engined DC-4 into a "flight of ducks" at about 10,000 feet over Iowa on a flight to the west coast from Chicago. He spat out so many duck bodies about and with such force that he decided to play safe and returned to Chicago for possible repairs. One engine nacelle was dented and the passengers had to transfer to another plane.

A second American Airlines pilot, flying a two-engine transport, from Rochester, N.Y., to Newark, N.J., ran into another flock of birds. He turned back to Buffalo, N.Y., for a quick checkup, found there was no damage, and took off again after a 25 minute delay.

At La Guardia Field, N.Y., a bolt of lightning within three feet of a trans world airline plane just about to take off with 13 passengers for a flight to Germany.

The bolt bowled over ground crew members, but nobody was hurt, although the lightning tore dozens of small holes in the landing apron.

Mechanics could find no damage to the four-engined constellation but officials ordered another plane to make the flight. The precautionary engine delayed the flight six hours while another plane was readied.

And over Michigan, the cockpit door of an American Airlines DC-6 snapped off and dropped 11,000 feet to earth near Coldwater, Mich. The wind sucked several of the passengers' coats out of the plane. The plane, carrying 52 passengers and a crew of five, landed safely at Detroit, and passengers continued on to New York aboard another transport.

The airline offered \$100 reward for the door, needed "to determine the cause of the accidents." The offer was scheduled to be made near Goldwater searching fields and other open areas.

Hold First Bicycle Safety Lane In Canada

ESTEVAN, Sask.—Estevan school children turned out in force recently to attend what is believed to be the first bicycle safety lane held in Canada, and is 'known to be the first in Saskatchewan.

The lane, sponsored by three Estevan service organizations and the Saskatchewan highways traffic board with co-operation of town police and the local detachment of the R.C.M.P., proved to be a huge success as nearly 150 Estevan children put their bikes through five pre-arranged tests to qualify for a sticker which reads, "I pledge to ride safely."

The program, besides attempting to measure a degree of expertness of the rider, aimed to create a feeling on the part of the rider that there is more to bike riding than just "hopping on and pedalling." The five tests used in the lane involved balance, hand signalling, pedalling, braking, dismounting and control.

The tests enabled riders to acquire information and knowledge in safe riding practices, cycling rules and regulations.

GEMS OF THOUGHT

DISCRETION

The greatest traits, without discretion, may be fatal to their owner.—Hume.

All the world over it is true that a double-minded man is unstable in all his ways, like a wave on the stream, tossed hither and thither with every eddy of its tide.—Fuschna.

How little do they see what really is, who frame their hasty judgment upon that which seems.—Southey.

Discretion in speech is more than eloquence; and to speak agreeably to him with whom we deal is more than to speak in good words or in good order.—Bacon.

Though a man has all other perfections and wants discretion, he will be of no great consequence in the world.—Addison.

Be sure that God directs your way; then, hasten to follow under every circumstance.—Mary Baker Eddy.

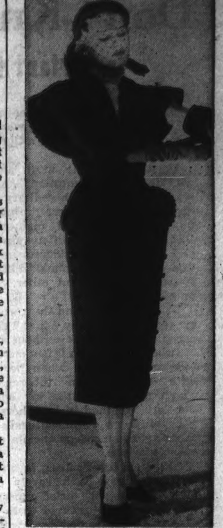

Tells Secret Of Husband-Calling

DALLAS, — Mrs. Minnie E. Cope, Shreveport, La., who says she's "only 73 past" in years, won the women's fiddling and husband-calling contests at the state fair of Texas.

Her secret of husband-calling—"I just imagine he's an hour late for supper and I have just spied him talking to a pretty woman neighbor."

"Then I'm in a mood for good husband-calling in a kind of panther mood."

Canadian Fashion

VERSATILE—Afternoon dress of black crepe is called "Time On My Hands." Pleated "shoulderline" in rounded and pleating repeated on hipline pockets. Elbow-length sleeves are detachable.

Taking Census Of Antelope On Prairies

(By Kenneth Lamb)

REGINA, Sask.—R. Saskatchewan government pilot and two field officers were trying today to take an aerial bead on North America's fastest four-legged animal—the antelope.

They wanted to count them, not shoot them.

Pilot Bruce McCondaugh, game warden—Bob Blackwood and field officer Jack Shaver are counting antelope in a 10,000 square mile area in southwestern Saskatchewan. Their figures would determine whether there would be an antelope-hunting season this fall.

Provincial Game Supervisor W. A. Hartwell said Alberta and Montana co-operated in an aerial count last year, but this year Saskatchewan was doing its own.

"The men will make numerous flights one mile apart over the area," Hartwell said. "They will count every animal they see."

He said they would do most of their counting in the morning and in the evening when the sun is in a position which makes it easier to spot the antelope's white markings.

In 1949, hunters killed more than 600 antelope in Saskatchewan alone. In addition, many of the animals died during an unusually cold winter in Southwestern Saskatchewan. A full month of severe weather froze the forelegs of many animals.

The game supervisor believed there were now more antelope north of the South Saskatchewan River than there were a year ago due to migration from Alberta last winter.

"Heavy snow in Alberta drove about 1,500 antelope eastward along the railway track," he said. "They got as far as Gull Lake, then dispersed in three groups. We dropped feed to some of them from an airplane."

Hartwell said the animals followed the rail line from Alberta because they rarely crossed a fence.

Hunters won't take much comfort from the increase north of the river since hunting is confined to the south.

Hartwell said antelope provided about the best possible hunting.

"They're almost a little larger than a police dog—and fast. They can travel about 70 miles an hour for a short distance," he said.

Hunters almost always have to shoot at a moving target from a distance of 250 to 300 yards. A so-so hunter hasn't much chance."

An antelope, brownish with white face and rear, weighs about 50 or 60 pounds. The small amount of meat is delicious.

Hartwell said the coming of settlers who built fences restricted the antelope's range and reduced their numbers.

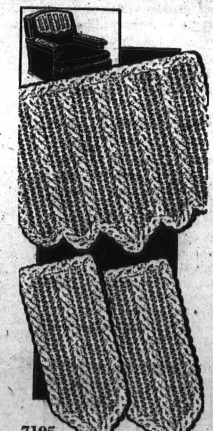

Alberta and Saskatchewan co-operated in setting the hunting season dates, and were considering limiting reciprocal antelope hunting licenses this fall.

VARIABLE MEASURE

In Bengal, a wayfarer estimates the distance travelled by breaking off a branch and, when it withs, he will have walked one koo, a distance that varies from 1 1/2 to three statute miles.

Coffee is native to Colombia.

Patterns Knit On Two Needles

7195

Allice Brooks

New and fascinating knitting for you! A chair-stitch done in cable stitch and a lay pattern stitch. And it's all done on two needles!

It's sensational! A knitted chair-stitch—and so easily done! Pattern 7195; knitting directions.

Our improved pattern—visual with easy-to-see charts and photos, and complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted).

Household Arts Department, Winnipeg Newspaper Union, 50 Front Street W., Toronto. Be sure to write plainly your Name, Address and Pattern Number. It's the best ever—our latest Allice Brooks Needlework catalogue. Send twenty-five cents in coins for your copy. Illustrations of designs for crocheting, knitting, embroidery, toys, children's clothes. Free needlework pattern is printed in book.

What the People Don't Know . . .

Important Information About TB

Tuberculosis—The Disease

The tubercle bacillus, the germ which causes tuberculosis, was discovered by Robert Koch, a German doctor, in 1882.

Up to that time most people considered "consumption," as it was then called, a hereditary disease though there were prominent physicians who had maintained that it was an infectious disease and should be considered in the same category as typhoid, diphtheria, scarlet fever and other communicable diseases.

When Koch isolated the germ he proved conclusively that there was no tuberculosis without it.

Tuberculosis is an infectious disease and is spread when persons with active, open tuberculosis cough germs into the air where they are breathed in by others, or get germs on eating utensils or other articles used by people with tuberculosis.

Although tuberculosis is an infectious disease it is rarely contracted from very brief exposure. In the vast majority of cases the disease is contracted by continued exposure, such as living, rooming or working with a person who has TB without taking the careful precautions which are used in hospitals to avoid infection. Those who live in the same household or work close to a person with active TB are in grave danger of getting the disease.

Some people have more resistance to TB than others and the resistance of any one person may differ from time to time. A rested, well nourished body is much more resistant than one which is undernourished, or tired out by lack of sleep or illness.

TB can attack almost any part of the body, but its most frequent attack is on the lungs. This is called pulmonary TB and it is responsible for about 85 per cent of all TB in Canada.

Tuberculosis is not inherited. It is true that several members of a family often get it, but that is be-

cause of the way the disease is contracted. Our bodies are generally able to cope with a few germs encountered here and there, but when one member of a family has active TB other members get germs week after week, month after month, with the result that by the time the most serious case is discovered, one or more other members of the family may also have it.

TB does not announce itself quickly or obviously as do mumps, measles, whooping cough or smallpox. Nor does the patient become ill so quickly that there is alarm as in the case of typhoid. In the huge majority of cases the patient does not suspect TB until the disease has a rather firm foothold. In the early stages there are seldom any symptoms to alarm the victim.

Diagnosing Tuberculosis

Even though there are no symptoms when TB first strikes, pulmonary tuberculosis can be detected even in the early stages by a chest X-ray.

The chest X-ray is the most efficient tool yet discovered for finding TB of the lungs. By chest X-ray examination TB can be detected before symptoms warn that something is wrong.

Although X-ray films are indispensable to a doctor diagnosing TB he does not depend on them alone. Other tests are made, such as those which determine whether or not there are TB germs in the sputum.

Treating TB

Tuberculosis can be cured. Thousands of persons are cured of it every year.

Rest is fundamental to the treatment of TB. Complete rest under medical supervision at a sanatorium is best.

Bed rest for the tuberculous is sometimes supplemented by other treatment. Sometimes it is helped by surgical procedures which collapse the lung either temporarily or permanently.

The most common of these pro-

Better Returns from Registered and Certified Seed

OTTAWA, November—Because of adverse weather conditions in 1950, officials of the Dept. of Agriculture, Ottawa, point out that much of the registered and certified seed will likely be graded "Registered No. 3" and "Certified No. 2," mainly owing to discoloration. Prospective buyers of seed should bear in mind that even the lowest grades of registered and certified seed are of selected seed stocks which have been well processed and which offer more reliability than the top grades of general commercial seed.

Registered and certified seed are selected seeds of recorded pedigree, which have been tested for purity as to variety, freedom from weed seeds and other kinds of seed, and have been inspected, graded and sealed in closed containers by an inspector of the Department of Agriculture.

Taxes Exceed Spending On Highways

The Bank of Canada estimates that provincial governments in 1950 will collect a total of 105,000,000 in gasoline taxes and motor vehicle license fees, says an article in the current issue of the B-A Commentator. Total expenditures of the provinces for highways and other aids to transport in 1950 will be \$109,500,000, which means that taxation of motor vehicles and their use will contribute \$5,500,000 toward other provincial expenditures.

Gasoline taxes now exceed by over \$21,000,000 the total expenditures of the provinces in 1950.

In Bygone Days

(The Farm Scene)

When our pioneer grandmothers cleaned and worked the wool, spun the yarn, wove the cloth, made the clothes, blankets and rugs, tended the garden and grew the flowers, preserved the fruits and vegetables, cured and canned the meat, made the soap and candles, milked the cow and made the butter, cared for chickens and marketed the eggs, raised the children in the fear of the Lord, kept the church thriving and the community sojourners alive, comforted and encouraged their husbands in turning forests into fields, our pioneer grandfathers found that two lived cheaper than one.

cedures is pneumothorax, a simple method of temporary collapse, brought about by injecting air into the space between the chest wall and the lung.

Thoracoplasty is an operation to collapse the diseased portion of the lung permanently. It is done by removing a section of the ribs which permits the lung to relax.

Two other ways sometimes employed to put the lung at rest are lobectomy, which is removal of a lobe of the lung, and pneumonectomy, removal of the entire lung, a step taken when it seems the only course to arrest the disease.

Hundreds of drugs have been tried through the centuries in an effort to find one which would cure TB. Streptomycin, an antibiotic discovered six years ago by Selman A. Waksman, has proved the most effective so far. It is not a perfect drug for treatment of TB because some forms of the disease do not respond to it and tubercle bacilli have a tendency to develop resistance to it. Notwithstanding these shortcomings it has helped in thousands of cases.

Because of the limitations in the success of streptomycin, scientists are trying to find other drugs which either alone or in combination with streptomycin will help a greater number of patients. So far the best results have been obtained from one called PAS, which is short for paraaminosalicylic acid.

No drug or surgical procedure takes the place of rest in the treatment of TB. They are adjuncts, not substitutes, for rest.

Climate is not important in the treatment of TB. People are cured of it in every climate.

If a patient has been told by the medical staff that he may safely leave the sanatorium because his disease is arrested, that person is not a danger to others. He would not have the permission of the medical staff to leave if he were spreading infection.

Coarse Grain Marketing Control Act . . .

The Hon. D. A. Ure, Minister of Agriculture, advised recently that there seems to be some misunderstanding regarding the terms of the Coarse Grain Marketing Control Act, that is, Chapter 25 of the 1949 Statutes of Alberta.

To clarify the position Mr. Ure explained that this Act prohibits the sale of coarse grain to any person other than the Canadian Wheat Board, but an exception is made to cover sales between producer and owners of live stock and poultry. Although the Government has indicated its intention to enforce the provisions of the Coarse Grain Marketing Control Act, subsection 2 of Section 4 of the Act states that:

a. A producer may sell or agree to sell coarse grain situated in the Province of Alberta for delivery to a producer or to an owner of livestock or poultry within the Province;

b. A producer or an owner of livestock or poultry may purchase or agree to purchase coarse grain situated in the Province of Alberta either for delivery within the Province or for his own use.

This exception in the Act allows a producer to sell coarse grain to another producer or to the owner of livestock or poultry within the Province.

GOVERNMENT NOTICE

Use of Provincial Crest Prohibited

The Alberta Crest is reserved for the use exclusively of the Provincial Government by the Provincial Arms Act.

Any person, firm, corporation or association using the Alberta Crest on Calling Cards, Letterheads, Souvenirs, Publications or otherwise, is doing so illegally and the practice should be discontinued forthwith.

Government Business Is Your Business

WITHOUT
Health
THERE IS NO REAL
Happiness!

To help maintain the health of its people is a government responsibility; to increase personal happiness through good health is the responsibility of the individual.

The Department of Health, through its district nurses, district health units, clinics, and other services, functions solely for the purpose of safeguarding health and improving health standards.

You are asked to familiarize yourself with provincial health services and recommended health rules and practices so that you are capably informed when disease or illness threatens. When in doubt, consult your doctor, or if no medical service is available consult your district nurse.

Your Department of Health offers diagnostic, instructional, clinic or hospitalization service as follows:

ARTHRITIS: Free investigation and diagnosis and treatment where indicated and ordered by the Director of Arthritis Clinics, to all under 21 years of age suffering from rheumatoid arthritis. Clinics at Edmonton and Calgary.

CANCER: Free radium, X-ray and surgical treatment plus free hospitalization when necessary for diagnosis where ordered by the Cancer Clinic in Calgary or Edmonton.

MATERNITY HOSPITALIZATION: Free public ward hospital care for all maternity cases.

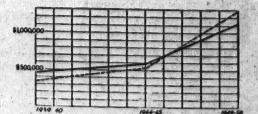

POLIOMYELITIS: Free medical, surgical and hospital treatment for all suffering from paralysis due to poliomyelitis. Special academic instruction for children and vocational training for adults.

TUBERCULOSIS: Free treatment for all cases of tuberculosis and free diagnostic service through clinics and mobile X-ray units. Sanatorium beds maintained at Calgary and Edmonton with 300 additional beds to become available in the new Aberhart Memorial Sanatorium.

MENTAL HYGIENE: Mental patients are benefiting by the advanced methods used in provincial hos-

pitals and training school. Provincial Guidance Clinics are held regularly for cities, towns, and rural areas giving preventive service to promote good mental health.

NURSING SERVICES: District nurses in remote rural areas provide the following services free: Pre-natal, natal and post-natal care. Free immunization services. Regular baby clinics. School health inspections and emergency service.

Dotted line shows increased amounts spent for Cancer and Tuberculosis treatments in past ten years. Heavy line shows increased grants to Alberta hospitals in past ten years.

Wedding Bells . . .**Benson - Mikkelsen**

Central Lutheran Church in Edmonton was the scene of a very pretty wedding on October 18 at 6:30 p.m. when Haldis Mikkelsen, daughter of Mr. and Mrs. I. Johansen of Kinsella, was united in marriage to Mr. Overt Iverine Benson, son of Mr. Ole Benson and the late Mrs. Benson of Viking. Rev. T. W. Maakestad was the officiating clergyman. The church was prettily decorated with white and bronze 'mums.

Given in marriage by her father, the bride chose a gown of powder blue satin with net yoke

with halo and chapel veil, with matching accessories, and carried a bouquet of pink roses. A string of pearls was the gift of the groom.

The bride's attendant's were Mrs. Arthur Grenier, as bride's-matron, and Mrs. N. Neilson, matron of honor, both cousins of the groom, who wore gowns of yellow crepe with pink sheer and orange blossom bandeaus, with corsages of yellow roses and carnations. The bridesmaids wore pink and white neckties.

Mr. Arthur Grenier and Mr. Arvid Johansen attended the groom. The ushers were Mr. N. Neilson and M. Melvin Benson.

For her daughter's wedding Mrs. Johansen wore a blue dress, black hat and corsage of red roses. The bridegroom's aunt chose a black crepe dress, black hat and corsage of pink carnations. The wedding music was played by Mrs. T. Gruie, and as soloist Miss Grace Burton sang the Lord's Prayer and I Love You Truly. The toast to the bride was given by Mr. James Kimbhorn to which the groom replied fittingly.

After the ceremony a reception was held at the Cottage Tea Room. For travelling the bride chose a grey 'abard'ne suit, wine top coat and grey and black accessories.

Out of town guests were Mr. and Mrs. I. Johansen, Kinsella; Mr. and Mrs. T. Berge, Kimberly, B.C.; Mr. O. Benson, Mrs. B. Benson, Mr. and Mrs. M. Lausten, Miss May Duncan and Mr. James Kinghorn, of Viking; Mr. and Mrs. Edward Benson, Mr. and Mrs. E. H. Benson, of Westlock; Mrs. G. Oland, Mrs. H. Tee, both of Ryley; Mr. James Guiltner and Miss Edna Johansen, of Kinsella.

Wedding arrangements were in care of Bowes Wedding Service, Edmonton, Alberta.

Motorists Warned Of Carbon Monoxide

At this time of the year, there is a deadly menace for motorists. This is carbon monoxide, a treacherous poison gas. Only recently, two young persons were found dead in their car in Edmonton, victims of the deadliest of the many chemicals which come from the motor of an automobile.

Carbon monoxide is colorless, odorless and tasteless and cannot be detected by the senses. In slight amounts it may cause headache, drowsiness, dizziness or nausea.

The danger is much greater than is generally supposed. In a recent investigation, one out of every 20 cars picked at random and tested with instruments contained sufficient carbon monoxide in the passenger compartment to impair driving judgment seriously enough to cause accidents.

Officials of the AMA, in sounding a warning of this deadly poison gas, suggest these simple rules:

1. Never have your car motor running while doors of garage are closed.
2. Never have windows of car completely closed.
3. Have a regular inspection of the exhaust system and the "seal" between the body of the car and the engine section, to discover any leak.
4. Warn all members of your family, especially in winter, of this danger.

To bring this anti-aircraft gun into action calls for a full crew — skilled men trained to fight as a fast-charging, fast-acting team. To train such a crew takes time: gun crews must know how to handle modern scientific equipment — electronics, radar, radio, telephone; men must work together with the closely timed co-ordination of a championship football team.

The Canadian Army Active Force needs men today — keen young men who can begin training immediately as anti-aircraft gunners. You can take your place at the side of the men who defend Canada by reporting for training without delay. Act now — and help make Canada strong.

Queen of Sheba One of the Many Lures For Expedition Uncovering Ancient City

By FRED J. WALKER
Central Press Canadian
Correspondent

Preliminary digging at a lost city, buried under desert sands since the time of Christ, has uncovered priceless art objects and gives promise of filling in important gaps of history.

Wendell Phillips, president of the American Foundation for the study of Man, made that announcement in San Francisco in revealing that an elaborately equipped scientific expedition soon will undertake a thorough study of the site.

The city of Timna, comprising 64 acres of stone buildings, located in the Aden protectorate, southwestern Arabia. It was sacked and burned by unknown invaders about 60 B.C.

"We are excited about the prospects," said Phillips, leader of the expedition, "as we are now down to a level where important discoveries are anticipated, dating from approximately the sixth century B.C."

"Among our important finds so far are two bronze lions, the finest art objects yet discovered in Arabia; a lovely translucent alabaster head of a young woman with painted blue eyes, dating from the second century B.C., and a solid gold necklace showing remarkable artistic workmanship."

"Timna lies on an old spice route of biblical days, believed used by the Queen of Sheba when she travelled to Jerusalem to visit Solomon."

"The name Timna appears in the Old Testament, as the name of the tribe of Horites. It was the capital of the ancient kingdom of Qataban."

Phillips said that all indications pointed to Timna as being peopled by a race of great cultural and artistic merit, possibly influenced by the Mediterranean world. He continued:

"Walls of many of the buildings have beautiful inscriptions, and scholars now are studying our preliminary discoveries."

Originally seen from the air Timna was inspected by Phillips in 1949, after which he organized the first scientific expedition to explore that part of the world.

This expedition, which worked last February, March and April, employed 200 Arabs as excavators to clear away the top layer of sand and debris from the buildings and temples.

"And this preliminary work," said Phillips, "gave us hope of making discoveries in the future in excess of our wildest dreams."

Funds and equipment for the expedition were contributed by individuals and corporations interested in furthering a non-profit educational and scientific study of one of the last great unexplored regions of the world.

The Carnegie Museum of Pittsburgh was associated with the American Foundation in the expedition and will exhibit the discoveries. Among other contributing corporations were Chrysler, which supplied 18 Dodge power wagons; Shell Oil, 50,000 gallons of gasoline; U.S. Steel Corp., transportation.

The United States navy provided radio equipment and medical supplies.

YOU'RE TELLING ME By WILLIAM RITT
Central Press Canadian Writer

They're taking the kick out of our gasoline. Ethyl's got a date with a soldier.

Before you go knocking that move, consider that the auto industry resisted a proposal to take the spare tires off new cars. The industry doesn't want us to be left flat.

Autumn is the saddest season of the year. Each week half of the football teams lose.

A Swedish teacher says he kissed a girl on a train in Bulgaria and was told by police the law required him to marry her. If that isn't dictatorship it certainly smacks of it.

Astronomers have proved that length of the day is changing, but they say an atomic clock is necessary to prove the exact variation. If we keep fooling around with the atom we may not even need to know what day it is.

A Los Angeles biochemist developed a tasteless powder which cures up an alcoholic drunk in less than two hours. It takes some bar habitués longer than that to get drunk.

It's a question whether such a preparation would be good for hard drinkers. What will it lead to if you can get drunk and sober up three or four times a day?

One reason for the variation is the slight expansion and contraction of the earth. It probably swells up from international quarrels, then shrinks in shame.

Individual contributors included E. Roland Hartman and Jack Heinz of the food packing organization.

Phillips rates as a remarkable individual himself.

In 1947, at the age of 25, he organized the University of California African expedition, the largest expedition ever to conduct scientific research in Africa.

A total of 53 scientists and technicians, including members of the United States army, navy and marine corps, covered Africa from Cairo to Cape Town and Zanzibar to the Congo.

One of the men chiefly responsible for the expedition was attorney John Francis Neylan of San Francisco, a regent of the university. He backed the youthful Phillips in the ambitious undertaking.

Phillips' Mount Sinai expedition, recently completed, microfilmed 1,800,000 manuscript pages for the Library of Congress in Washington at the Monastery of St. Catherine on the slopes of Mount Sinai.

An outstanding discovery was an early vellum manuscript with four languages superimposed, expected to throw new light on the Bible. It is now under intensive study by scholars.

Chief archaeologist of the Arabian expedition is the renowned biblical scholar, Prof. W. F. Albright, chairman of the Oriental Seminary, Johns Hopkins University.

Associated with Albright are scholars from five other countries. Of his hopes for the Arabian study Phillips said:

"We hope to definitely establish the authenticity of the Queen of Sheba—make her an historical person, as it were. Timna, we think, may hold the key, because indications are that Timna fought for generations with the kingdom believed to be that of this legendary queen."

Expedition leader Wendell Phillips (left) and assistant, 19-year-old George Farrier, pose with obelisk found from Fourth Century B.C. It was uncovered in the centre of the ancient site.

Most important discovery in South Arabian archeology is this Second Century B.C. bronze lion and cupid. —Central Press Canadian Photos.

New Brand Of Automobile—Not For Highway Use

SOUTH BEND, IND.—There is a new brand of automobile seen around South Bend these days—a sleek, custom-made job that goes all day on one tank of gas.

But don't get excited. It's not for you, unless you want a gift for a youngster under eight years old. The autos are strictly midgets, and not for highway use.

Anthony LaCava, local tool and die maker, built the first pint-sized vehicle for his four children. It was a neighborhood success and LaCava, to date, has built six others. He plans to go into mass production as soon as he obtains the necessary equipment.

The tiny cars measure 22 inches high, 34 inches wide and 72 inches long. They have adjustable seats and can be driven by a lot of adult. LaCava manufactures all the parts himself, except the wheels and the engines, which range in size from one and one-half to two horse power. A special feature is a combination clutch and brake which starts the car when pushed down, and stops it when released.

Full-Time Medical Services
OTTAWA.—Doctors have recently been stationed at Hazelton, B.C., and Fort Rae, N.W.T., to provide full-time medical services for Indians in those districts and four more Indian health centres are under construction in Ontario and Quebec, the health department announced.

To Live Right — Eat Right.

SKUNK SHOWS THANKS
SYRACUSE, N.Y.—Three unidentified boys got a skunk out of a jam in the heart of the city. They bravely smashed a bottle in which the skunk's head had become wedged, as scores of people watched—from a safe distance.

The appreciative skunk returned the favor. He did nothing.

HOW NAME ORIGINATED
The royal line of Stuarts got their name from Robert II, king of Scotland, son of Walter, the Stewart of Scotland.

THERE'S A LIMIT TO HOW FAR IT WILL STRETCH

Seedless Watermelon Developed In Japan

CHICAGO.—A seedless watermelon has been developed in Japan and will be put on the American markets next spring, a Chicago seed company reported.

Alan Vaughan, an executive of the company, said the seedless melon has the same size and flavor of the ordinary variety, but affords a "pleasant experience" for the eater in eliminating the seeds.

The melon is the product of a hybrid seed similar to hybrid corn and developed through hand pollination in Japan, Vaughan said. He said the hybrid seed at present is much more expensive than the common variety, but that the cost may drop if the product is sold widely.

ARCH OF B.C. TIMBER
LONDON.—Made from wood presented by the British Columbia timber industry, the arches above the main entrance to the Festival of Britain Exhibition next year will be the largest ever constructed in Europe. Each arch contains 25 separate layers of wood.

TRAVELS FOR FUN
HALIFAX.—A 65-year-old grand-mother drove her car into town the other day and said she added 5,280 miles to a trans-continental trip because she had 52 much fun.

Mrs. H. S. Milliken said she drove to Vancouver intending to sell her car there. The venture proved so enjoyable she turned around and wheeled the vehicle home.

RECIPE HINTS

Macaroni salad flavored with olives, sharp cheese, crisp vegetables, and Russian dressing, is a treat to serve to a hungry family.

Macaroni Chef's Salad

Two and one quarter cups macaroni, 12 stuffed olives, sliced, 3/4 lb. cheddar cheese cubed, 1 cup cubed bologna or other spicy cooked meat, 3 tomatoes, quartered, 1 cucumber, sliced, salad greens, Cook macaroni in boiling, salted water until tender; drain, rinse with hot water; chill. Combine macaroni, olives, cheese, bologna, tomatoes and cucumber. Place in salad bowl with salad greens. Toss with Russian dressing. Yields 6 generous servings.

Set a bowl of salad dressing in centre of round chop plate in a cantelope-half. Pipe sliced peaches, melon balls, orange segments and cherries around this and let each person "make" his or her own fruit salad.

Or, cut melon centres into cubes or balls and mold in your favorite gelatin recipe, garnishing with macaroni, olives, cheese, bologna, tomatoes and cucumber. Place in salad bowl with salad greens. Toss with Russian dressing. Yields 6 enjoyment.

Sees Day Ocean Will Outstrip Land In Supplying Food

TALLAHASSEE, Fla.—The sea some day may produce more food than the land, according to Dr. Harold J. Hume, director of marine biology at Florida State University.

Dr. Hume added that, in terms of economic value, the great variety of raw materials that eventually may be obtained from the sea through marine research may be worth as much as the food.

"We have only begun to tap these resources," he explained, pointing out that marine scientists have scarcely begun when compared to the contributions of botanical and zoological sciences to agriculture and animal husbandry.

The marine biologist said that water covers 70 per cent of the earth's surface. Yet, in terms of actual human food production, 98 per cent of the food comes from the land.

"The productive capacity of the sea has been estimated by marine biologists to be approximately twice that of the land per square mile."

"We do not know just how much fish the sea can produce, but we do know that for every fish in the sea there is perhaps 1,000 times as much organic matter in some other form," he added.

Dr. Hume was director of the Marine Biology Laboratory at Duke University for seven years. His research work at Duke on the economic uses of seaweeds led to development of a large factory in North Carolina which now manufactures medical products from basic seaweed formulae.

Seedless Watermelon Developed In Japan

CHICAGO.—A seedless watermelon has been developed in Japan and will be put on the American markets next spring, a Chicago seed company reported.

Alan Vaughan, an executive of the company, said the seedless melon has the same size and flavor of the ordinary variety, but affords a "pleasant experience" for the eater in eliminating the seeds.

The melon is the product of a hybrid seed similar to hybrid corn and developed through hand pollination in Japan, Vaughan said. He said the hybrid seed at present is much more expensive than the common variety, but that the cost may drop if the product is sold widely.

Mrs. H. S. Milliken said she drove to Vancouver intending to sell her car there. The venture proved so enjoyable she turned around and wheeled the vehicle home.

"Home Quiz" Craze Sweeps Vancouver

VANCOUVER.—A mushroom get-rich-quick scheme similar to the pyramid clubs of two years ago, has swept Vancouver.

It's called "home quiz". Enthusiasts say 13 weeks after a person joins he can win \$2,048, theoretically. Actually the pay-off is usually smaller than that, most of them being about the \$1,000 mark.

Clubs have been set up all over Vancouver by housewives, professors, doctors, lawyers and many others. The craze moved up to Canada's west coast from Seattle, Wash. where home quiz clubs have been operating for several months.

City Prosecutor Gordon W. Scott said the clubs are illegal under the lotteries section of the Criminal Code, and raids have been carried out on some of the clubs.

Police said thousands of persons have joined clubs here.

Mrs. C. K. Barron, a housewife, joined after seeing a story in a newspaper warning of a police crackdown on home quiz clubs, said:

"It seems to be perfectly legal to me. I think they're just trying to scare people. And I want to get in on it early because if you're there first usually you can get the money."

Most of the winners seem to prefer to keep their identity secret, but the majority said they put the winnings into the bank. One night recently a 1950 car, while a housewife purchased complete new furniture for her home.

The craze hit Vancouver with the same impact as did pyramid clubs two years ago. One night recently in one apartment block alone, seven of its ten suites were holding home quiz parties. A professor at the University of British Columbia is an ardent fan, and has lost his wife and daughter of the chief of police are said to be members.

The details are much the same as those for pyramid clubs. To become a member of a home quiz club a person pays \$1 to a secretary treasurer. Thirteen weeks later he gets the pay-off.

In each club there are 32 grand treasurers and each grand treasurer has 16 secretary-treasurers. Each secretary-treasurer has a party at his house entertaining 15 new members once a week. The members pay him one dollar apiece. Members graduate up the scale to grand treasurers, conveners, and from fourth to first president. The first president is the person at the top of the list who wins the money.

The secretary-treasurers turn the dollars over to grand treasurers at another party. Then the grand treasurers get together for a party at which they hand the money over to a president. The president is asked a simple question, such as "how are you?", before he is given the money. Home quiz enthusiasts say that gets around the Criminal Code. But the police say it's still against the law.

Are You Grown Up?

Whatever your age, you aren't completely grown up if:

It makes you unhappy to see a friend get ahead or be able to buy things you can't afford.

You feel there is just one "crowd" in your town you want to belong to—and that if they accept you, you'll really amount to something.

You have to "get even" with anyone who slighted you in any way.

You keep strict account of what you do for others—and expect them to do equally as much for you, resenting it when they don't.

You feel the need to tell everyone you can count on to listen to all your troubles and boost your ego by telling you that you are in the right and whoever disagrees with you is in the wrong.

You are more concerned with the impression you make on others when you first meet them than in enjoying the chance to get acquainted with a new person.

You are miserable if you hear about a party to which a lot of your friends have been invited but to which you have not received an invitation.

If you do another person a favor you make quick work of seeing to it that all your friends know of your good deed.

It takes you a long time to make even a simple decision—and after you've made it you worry for fear it might have been better differently.

You get your feelings hurt easily—and when they're hurt you don't try to hide the fact, but want the other person to know how callous he has been.

J. C. McFARLAND Co. Irma

Locals

The local representatives of the British and Foreign Bible Society will be canvassing here in a week or so. This is not in connection with our local church here. The British and Foreign Bible Society is undenominational and international. Its purpose is for the providing of Bibles wherever needed in the whole world. Give to the British and Foreign Bible Society, it is something we can all do to promote world peace and the brotherhood of man.

Mrs. T. G. Coppack, early pioneer of the Castor district passed away suddenly at her home on Sunday, November 19. Mrs. Coppack was an aunt of Mrs. R. C. McFarland and frequently visited here at Irma.

We are very glad to see Mr. A. H. Locke back at his home. Mr. Locke has been in Edmonton convalescing following a back injury but is now well enough to go about his usual duties.

The Rev. F. Kemp has been a guest at the Simmermon home this past week-end and has had a very enjoyable time renewing old acquaintances with his many friends at Irma.

Mr. and Mrs. T. Ford Jr. are the proud parents of a new baby son born last week at Wainwright.

Mrs. Alfred Klontz of Ryley was an Irma visitor this week.
